

Tip: Think about all the equipment you would need to make a badge

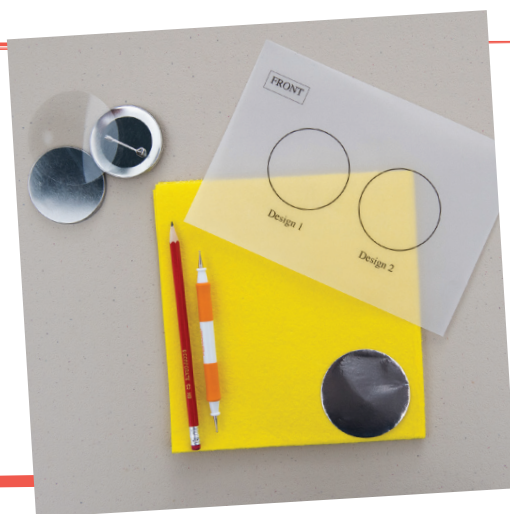

How to make a coin badge

You will need:

- Pencil with a rubber on the end
- Felt mat
- Foil circle
- Badge maker
- Badge parts
- Embossing tool
- Tracing paper template

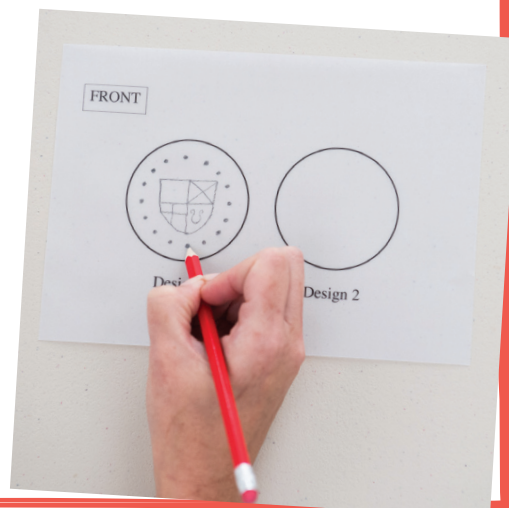

Insert picture of your coin badge here

1. Gather all the equipment together and put it on a flat, hard surface in front of you.

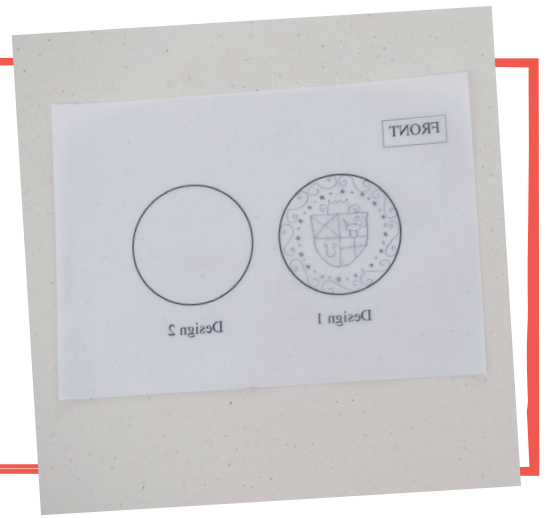

2. Use the pencil to draw your coin design on to the tracing paper template.

3. Draw two designs and choose your favourite.

4. Turn the tracing paper over so that your design is now backwards.

5. Put the felt mat down on the table.

6. Put the foil circle down on the felt.

7. Put the tracing paper design over the foil.

8. Use the embossing tool to go over your design, pressing it into the foil so the design comes through to the metal.

9. Take the tracing paper off and check that your design has been pressed deep enough into the foil.

10. Use the embossing tool to make the design deeper if you need to.

11. Take away the felt mat.

12. Turn the foil over, so the design is facing up.

13. Use the embossing tool to go around your design to make it stand out.

14. Use the rubber on the end of your pencil to flatten the foil around your design.

15. Follow the instructions on the badge maker to turn your foil into a badge.

Ask an adult to help you.
